About Me | Audio / Visual

Multimedia

Giant LED walls, live show programming, geeking out on new microphones, cameras, stacking layers of compression... Digital technology has continued to improve the production value of TV, music, videos, theatre, concerts and so much more. These have been my creative outlets - spending time doing AVL, photography, videography and music. Combine these things with tech, and it gets so much more interesting! I've worked on several projects that have enabled me to tie my interests together and enjoy them simultaneously!
